Guidelines for the Website Development Contest

Thank you for participating in the **Sanuma India Pvt. Ltd. Website Development Contest**.

This contest is a part of our hiring process to identify talented web developers who can build modern, fast, user-friendly, and SEO-optimized websites.

Objective

You will be provided with the reference website:

www.robuzta.com

Your task is **not to copy the website**, but to redesign and rebuild it into a significantly better version.

Improve it in every possible aspect, including:

- Modern UI & UX
- SEO
- Page Speed & Performance
- Mobile Responsiveness
- Accessibility
- Navigation
- Content Presentation
- Visual Design
- User Experience

Use your creativity, technical knowledge, and problem-solving skills to build the best possible website.

Contest Rules

- The reference website is provided only to help you understand the business and its services.
 - You are encouraged to redesign the website with your own ideas and creativity.
 - The website must be fully responsive across desktop, tablet, and mobile devices.
 - SEO optimization is mandatory.
 - The project should be clean, well-structured, and production-ready.
 - Host your website on GitHub Pages, Vercel, Netlify, or any other public hosting platform.
 - Keep your complete source code ready. Shortlisted candidates will be required to submit their source code or GitHub repository for review.
-

Permitted Technologies

The website must be developed using **frontend technologies only**.

Mandatory

- HTML5
- CSS3
- Vanilla JavaScript

You may use any frontend libraries/frameworks, including but not limited to:

- Bootstrap
- Tailwind CSS
- GSAP (GreenSock Animation Platform)
- Three.js
- AOS (Animate On Scroll)
- jQuery
- Swiper.js
- Splide.js
- Lenis
- Locomotive Scroll
- Typed.js
- Anime.js
- Chart.js
- Font Awesome
- Google Fonts
- Lottie Animations

Not Allowed

- PHP
- Node.js
- Express.js
- React
- Next.js
- Vue.js
- Angular
- Laravel
- Django
- Flask
- ASP.NET
- Ruby on Rails
- Java / Spring
- Any database (MySQL, PostgreSQL, MongoDB, etc.)
- Any server-side or backend technology

Note: Your final submission must be a fully functional **static website** consisting only of HTML, CSS, JavaScript, images, fonts, and other frontend assets. The website should be directly deployable on standard shared hosting without requiring any build process, server runtime, or backend configuration.

Research & AI Usage

You are free to use any legitimate resources available to you, including:

- AI tools (ChatGPT, Claude, Gemini, Cursor, GitHub Copilot, Antigravity, etc.)
- Documentation
- Tutorials
- Blogs
- Videos
- Open-source resources

You are encouraged to research, learn new concepts, and improve your skills throughout the contest.

The contest will be judged entirely on the quality of your final submission.

Submission

Please submit:

- Live website URL
 - GitHub repository (optional but recommended)
 - Your name
 - Email address
 - Contact number
-

Timeline

Submission Deadline: 10th July 2026, 7:00 PM IST

All submissions must be received before the above deadline. Late submissions will not be considered.

Evaluation Criteria

Your submission will be evaluated based on:

- UI & Visual Design
 - User Experience (UX)
 - Creativity & Innovation
 - SEO Implementation
 - Website Performance & Page Speed
 - Responsiveness
 - Accessibility
 - Code Quality & Maintainability
 - Overall Professionalism
-

Opportunity

Outstanding candidates will receive:

- **Paid Internship (3 Months)**
 - **Direct Mentorship from the Founder**, working on real-world projects and gaining practical industry experience.
 - **Opportunity for Permanent Employment** upon successful completion of the internship.
 - **Work From Home Opportunity** after successfully clearing the interview and meeting the company's expectations.
 - Exposure to modern web development, AI-assisted development workflows, and live production projects.
-

Final Note

This contest is more than a coding exercise—it's an opportunity to showcase your creativity, technical expertise, and problem-solving abilities.

Build a website that you would be proud to present to a real client. We are looking for developers who think beyond code and create exceptional digital experiences.

We wish you all the very best and look forward to seeing your submission.
